

BY-LAW NO. 5563A By-law to regulate electrical
works in the City of Vancouver

THE COUNCIL OF THE CITY OF VANCOUVER in open meeting assembled, enacts as follows:

1.0 INTERPRETATION

- 1.1 This By-law shall be cited as the "Electrical By-law".
- 1.2 Wherever the word "shall" is used in connection with any prohibited act or course of conduct, it shall be deemed to include the suffering, causing, permitting or allowing of such act or course of conduct to be done.
- 1.3 Unless the context otherwise requires, the following words and terms have the meanings hereinafter assigned to them:

"approved electrical contractor" means a person licenced to carry on business in the City of Vancouver as an electrical contractor and holding a valid provincial certificate of competency.

"City Electrician" means the person from time to time duly appointed by Council as City Electrician and includes any persons appointed as assistants to the City Electrician.

"City Engineer" means the person from time to time duly appointed by Council as City Engineer and includes any persons appointed as assistants to the City Engineer.

"electrical equipment" includes any machinery, plant, works, wires, pipes, poles, conduits, apparatus, appliance and equipment used or designed or intended for use for or in connection with the generation, transmission, supply, distribution or use of electrical energy for any purpose.

"electrical works" means electrical equipment.

"owner" includes an agent thereof, a registered owner and an owner under agreement, and when used with reference to electrical equipment also includes the person having the custody, care, management or use of the electrical equipment.

"premises" includes the land and any improvements situated thereon.

"repair" means the reconstruction or renewal of any part of an existing electrical installation.

2.0 ADMINISTRATION

- 2.1 The City Electrician shall enforce and carry out the provisions of this By-law.
- 2.2 The City Electrician shall have the power, subject to the approval of Council, to employ such assistants and inspectors as he deems necessary for the purpose of enforcing and carrying out the provisions of this By-law, and such assistants and inspectors while at all times subject to the control and direction of the City Electrician shall have the same duties and powers as are delegated to the City Electrician by this By-law.
- 2.3 No persons shall interfere with or otherwise prevent or impede the City Electrician from enforcing or carrying out any of the provisions of this By-law.
- 2.4 The City Engineer shall enforce and regulate new construction or installation of any electrical equipment in, on, under or above any street.

3.0 GENERAL PROVISIONS

- 3.1 No person shall install any electrical equipment in, on or under any land or premises without first obtaining a permit from the City Electrician authorizing the installation.
- 3.2 No person shall connect any electrical equipment to any source or medium of electrical energy without first obtaining approval for the connection from the City Electrician.
- 3.3 No person shall construct, alter, repair or maintain any electrical equipment except in accordance with this By-law.
- 3.4 No person shall install any electrical equipment unless it has been approved in accordance with this By-law.
- 3.5 No person shall display, advertise, offer for sale, sell or otherwise dispose of electrical equipment unless it has been approved in accordance with this By-law.
- 3.6 If electrical equipment does not comply with By-law, or is being or has been connected, installed, constructed, altered, repaired or maintained in a manner which does not comply with this By-law, the City Electrician may disconnect or cause such equipment to be disconnected and may by notice to the owner or person in control of the equipment or premises where the equipment is located:
 - (a) order that all work on the equipment be discontinued;
 - (b) order that the equipment be forthwith removed;
 - (c) order that the equipment be altered or reconstructed to comply with this By-law; and

- (d) order that any connection, installation, construction, alteration, repair or maintenance be in compliance with this By-law.
- 3.7 Every person owning premises on or in which are dead wires, unused poles or unused electrical equipment shall, within 3 days after being served with an order by the City Electrician to do so, remove the wires, poles or equipment from the premises.
- 3.8 Nothing contained in this By-law shall be deemed or construed to relieve any person owning, operating, constructing, installing, altering, repairing or maintaining any electrical equipment from any liability for damages to any person injured by the operation, construction, installation, alteration, repair or maintenance of such equipment, nor shall the City be deemed to have assumed any liability by reason of any inspection authorized by this By-law.
- 3.9 Nothing in this By-law affects or impairs any contract with the City or any rights, powers or privileges now had or enjoyed by a public utility under its Act of Incorporation or any special Act.
- 4.0 SPECIAL PROVISIONS
- 4.1 Where, because of an emergency, there is an inadequate supply of the electrical equipment required by this By-law, Council may by resolution relax any provision of this By-law.
- 4.2 Where, because of fire, storm or other calamity, life or property is likely to be endangered by the existence or operation of any electrical equipment, the City Engineer, the City Electrician or the Fire Chief may direct the owner or person in control of the premises where the equipment is located to forthwith disconnect or remove the equipment, and if that person fails or refuses to disconnect or remove the equipment as directed, may cause it to be disconnected or removed.
- 4.3 Where a person carries on the business of manufacturing or producing electrical energy for his own use or for sale, and where emergency repairs are necessary within that person's generating station, a permit shall not be required, but within 24 hours after commencing such repairs that person shall advise the City Electrician of the circumstances of the repair, and such person shall not be exempt from any other provision of this By-law including inspection, regulations and payment of fees.
- 4.4 Every person installing electrical equipment underground shall first obtain approval for its location from the City Electrician, who may require a plan showing the location of the service entrance, the supply company's manhole, and any overhead service proposed for connection to the underground service.
- 4.5 Every person installing overhead conducting wires shall cause them to be supported by poles except where, in the opinion of the City Electrician, it is not possible or practical to do so, in which case he may permit the wires to be otherwise carried over and connected to a building.

- 4.6 No person shall suspend wires or other electrical equipment above a street without first obtaining the approval of the City Engineer, who may require evidence that sufficient provision has been made for the carrying or placement of such public service equipment as he deems necessary, and that the provisions of this and any other By-law have been complied with.
- 4.7 No person shall suspend wires or electrical equipment above a building without first obtaining the approval of the City Electrician, who may require the furnishing of such plans, statements or other documents as he deems necessary.
- 4.8 Every person owning, operating or in the control of wires or other electrical equipment suspended or located above a building shall, within 15 days after being served with an order from the City Electrician requiring him to do so, furnish the City Electrician with detailed plans and statements showing the following:
- (a) the number and location of poles on the property;
 - (b) the number of crossarms on each pole and their spacing;
 - (c) the number of wires attached to each crossarm and the spacing and location of such wires.
- 4.9 The City Electrician may relax any provision of this By-law where he is satisfied that:
- (a) an installation of electrical equipment is intended to be temporary in nature; or
 - (b) equivalent protection is afforded by other means not specifically covered by this By-law..

5.0 PERMITS

- 5.1 Upon application by any person the City Electrician may issue a permit authorizing the installation, construction, alteration, repair or maintenance of any electrical equipment, and may include such conditions as he deems desirable, or he may refuse to issue a permit for such work.
- 5.2 The City Electrician may refuse to issue a permit to any person if:
- (a) the existing electrical equipment in, on or under the land or premises is not in compliance with all provisions of this By-law;
 - (b) information contained in the application for a permit is incorrect or inadequate to determine compliance with this By-law;
 - (c) any fees incurred by the person pursuant to this By-law have not been paid;

- 229
- (d) the person has failed to comply with a provision of this By-law or with a directive or order of the City Electrician made pursuant to this By-law; or
 - (e) the person is not an approved electrical contractor.

5.3 The City Electrician may revoke any permit if:

- (a) the permit was issued on the basis of incorrect information;
- (b) the permit was issued in error; or
- (c) there is a contravention of any condition under which the permit was issued.

5.4 The application for a permit shall be accompanied by the appropriate fee as set out in Schedule A of this By-law, shall be signed by the registered owner or his authorized agent, and shall include the following particulars:

- (a) the address of the premises for which the permit is sought;
- (b) the name and address of the registered owner of the premises;
- (c) the proposed use for the building or premises;
- (d) the number and description of all proposed outlets, fittings and electrical equipment including, where required by the City Electrician, specifications and a plan of the proposed wiring;
- (e) any other plans or specifications required by the City Electrician.

5.5 As a condition precedent to the issuance of any permit the City Electrician may require that any plans, specifications or drawings required by this By-law be approved by him.

5.6 The approval of any plans, specifications or drawings and the issuance of any permit shall not in any way relieve the owner or his agent from full compliance with the provisions of this By-law.

5.7 Any permit issued shall relate solely to the premises or location described in the permit and shall not be transferrable.

5.8 Except as otherwise provided for in this By-law, a permit shall be valid for 90 days from the date of issuance and shall, unless extended by the City Electrician pursuant to section 5.9, be void thereafter.

5.9 Where the City Electrician is satisfied that the work authorized by the permit has been commenced within 90 days of the date of issuance, he may extend the validity of the permit for a further period of 90 days or for such other period as he deems advisable.

5.10 Where a permit has become void by reason of section 5.8 but the City Electrician is satisfied that the delay in the commencement of work is beyond the control of the person to whom the permit has been issued, he may revalidate the permit for a further period of 90 days.

- 5.11 Notwithstanding section 5.8, where a temporary use of electrical power is necessary
- a) to facilitate construction of a building;
 - b) for decorative lighting of a temporary nature; or
 - c) before a permanent connection can be approved;
- the City Electrician may issue a permit for a temporary connection to electrical power. Such permit may be valid for a period of up to 120 days and may be renewed by the City Electrician for one or more periods of up to 120 days.
- 5.12 Notwithstanding section 5.8 the City Electrician may issue a permit, described as an "annual permit", which shall be valid for 12 calendar months from the date of issuance.
- 5.13 Where an annual permit has been issued to a person pursuant to this By-law, that person shall not be required during the term of such permit to obtain a permit for minor electrical works which do not increase the total connected load specified in the application by more than 5 percent.
- 5.14 In addition to the particulars required in section 5.4, an application for an annual permit shall include the following particulars:
- (a) the total existing connected load in horsepower for the premises;
 - (b) the number of full-time electricians, if any, employed by the owner of the premises;
 - (c) the name and address of any electrical contractors employed by the owner to service the premises.
- 5.15 No annual permit shall be issued to any person unless the City Electrician is satisfied that:
- (a) the premises described in the application are used for industrial or commercial purposes;
 - (b) either a full-time electrician or an approved electrical contractor is employed by the owner of the premises to carry out the work for which the annual permit is to be issued; and
 - (c) the nature of the business carried on or to be carried on in the premises necessitates the installation, construction, alteration or repair of electrical equipment before a regular permit can be applied for or issued pursuant to this By-law.
- 5.16 Where plans referred to in section 5.4 have not yet been approved, and notwithstanding section 5.7, the City Electrician may issue a permit for a limited period of time, described as an "interim permit", subject to such terms and conditions as he sees fit.
- 5.17 Any provision of this By-law which pertains to a permit shall also apply to an annual permit and an interim permit unless expressly exempted by this By-law.
- 5.18 If any person commences or causes the commencement of any installation, construction, alteration, repair or maintenance without first obtaining a valid permit therefor, the fee for such permit shall be double the applicable amount set out in Schedule A of this By-law.

5.19 Except as otherwise provided for by this By-law, a fee for a permit shall not be refunded.

5.20 Where an applicant has not yet commenced work authorized by the permit, he may apply in writing to the City Electrician for cancellation of the permit and a refund of a proportion of the fee paid, and where the City Electrician recommends the refund and certifies that the work has not been commenced, the Director of Finance may refund a proportion of the fee paid.

5.21 No permit shall be required for the following:

- (a) the replacement of defective fuses, receptacles, switches or lamps with usable units of similar type and rating;
- (b) minor alterations, repairs or additions to an installation covered by a subsisting annual permit issued pursuant to this By-law;
- (c) the connection of household and personal electrical appliances to a standard wall or floor receptacle.

6.0 INSPECTIONS

6.1 The City Electrician, or any person authorized by him, may inspect any electrical equipment wheresoever situated, and for that purpose may enter any building or premises at any reasonable time.

6.2 The City Electrician may remove or cause to be removed anything which in his opinion might constitute an interference with the inspection.

6.3 No person shall interfere with or otherwise prevent or impede the City Electrician or anyone authorized by him from carrying out the duties of inspection imposed by this or any other By-law.

6.4 If electrical equipment is for any reason defective, unsafe or hazardous, the City Electrician may disconnect the equipment or by notice in writing to the owner or occupant of the premises where such equipment is installed or used may order that:

- (a) the use of the premises or the use of the equipment be discontinued;
- (b) the equipment be immediately disconnected, or disconnected and removed from the premises;
- (c) the equipment be altered or repaired as he directs;
- (d) the manner of using the equipment be altered as he directs;

and he may impose a time limit with respect to such order.

6.5 The City Electrician may charge a fee, as set out in Schedule A, for every inspection, reinspection and survey necessary to establish compliance with this By-law, and may collect the fee from the owner of the premises.

- 6.6 Upon the completion of any installation of electrical equipment, or any portion thereof, and before such equipment is concealed or covered up, the holder of the permit authorizing the installation shall notify the City Electrician of the completion and shall identify the permit by number.
- 6.7 Within 2 working days after receipt of the notice referred to in section 6.6, the City Electrician shall inspect the equipment and
- (a) if he finds that the provisions of this By-law have been complied with, he shall post a card of approval at the place of installation; or
 - (b) if he finds that the provisions of this By-law have not been complied with, he shall refuse to post a card of approval and shall condemn the equipment or any portion thereof, or order changes to be made so as to comply with this By-law.
- 6.8 Within 48 hours after receipt of a notice from the City Electrician to make changes pursuant to section 6.7, the holder of the permit shall alter, reconstruct or otherwise change the equipment so as to comply with this By-law, and shall thereupon notify the City Electrician in the manner set out in section 6.6.
- 6.9 Unless and until electrical equipment has been inspected and posted with a card of approval by the City Electrician, no person shall cover up, or cut, disturb, alter or otherwise change the equipment.
- 6.10 After electrical equipment has been inspected and approved, no person shall place any pipe or other object adjacent to or cover the equipment in a manner that would have violated a provision of this By-law at the time of inspection.
- 6.11 For the purpose of this section, equipment shall be deemed not to be covered up or concealed merely by reason of the attachment of removable fixtures or fittings.

7.0 RULES AND REGULATIONS

- 7.1 The Canadian Electrical Code, Part 1, published by the Canadian Standards Association and numbered as C22.1-1978, together with any variations thereto adopted pursuant to the Electrical Energy Inspection Act, is adopted and made part of this By-law.
- 7.2 Where there is a conflict between a provision of this By-law and the Canadian Electrical Code adopted pursuant to section 7.1, the provision of this By-law shall prevail.
- 7.3 In addition to the regulations adopted pursuant to section 7.1 or referred to elsewhere in this By-law, the following regulations apply.

7.3.1 Change of Use or Occupancy

Where a change of use or occupancy occurs in or is proposed for an existing building, the electrical equipment therein shall be altered to comply with the regulations pertaining to the new or proposed use or occupancy.

7.3.2 Rewiring

Where, in the opinion of the City Electrician, proposed alterations or installations of electrical equipment amount to a substantial rewiring of an existing building, such alterations and installations shall comply with the regulations pertaining to the use or occupancy of the building.

7.3.3 Reconnection

Where electrical equipment in an existing building has been disconnected from a supply source, and remains disconnected for a period longer than 90 days, no person shall reconnect the equipment without the approval in writing of the City Electrician, except that where a change of use or occupancy is involved, the equipment shall be altered if necessary to comply with this By-law.

7.3.4 Grounding

Except where otherwise permitted by the City Electrician, all grounded wiring systems shall employ artificial grounding electrodes as the primary grounding device.

8.0 NOTICES AND ORDERS

- 8.1 Where an owner is to be notified of an order or directive pursuant to this By-law, it shall be sufficient to mail or deliver the notice to the address for the owner as listed in the records of the British Columbia Assessment Authority.
- 8.2 The City Electrician may order the immediate cessation of all or any part of any electrical installation being carried out contrary to this By-law, and shall give notice of such order by posting a copy on the affected premises.
- 8.3 Where a notice has been posted pursuant to section 8.2, no person shall commence or proceed with any electrical work on the premises without having first obtained the permission in writing of the City Electrician.
- 8.4 No person shall, unless authorized by the City Electrician, reverse, alter, deface, cover or in any way tamper with any notice, order, approval or permit posted upon or affixed to any building, place or thing pursuant to this By-law.
- 8.5 If, after being ordered or directed by the City Electrician or the City Engineer pursuant to this By-law, a person fails to do something within the time stated in the notice, the City Electrician may cause the matter or thing to be done and the cost to the City shall be recoverable by legal process.

9.0 OFFENCES AND PENALTIES

9.1 Every person who:

- (a) violates any of the provisions of this By-law;
- (b) suffers or permits any act or thing to be done in contravention or in violation of any of the provisions of this By-law;
- (c) neglects to do or refrains from doing anything required to be done by any of the provisions of this By-law;
- (d) does any act which violates any of the provisions of this By-law; or
- (e) fails to comply with any order, direction, or notice given under this By-law;

commits an offence against this By-law.

9.2 Every person who connects, installs, constructs, alters, repairs or maintains any electrical equipment or uses any building, premises or property which does not in all respects comply with the provisions of this By-law commits an offence against this By-law.

9.3 Every person who commits an offence against this By-law is punishable on conviction by a fine of not more than \$2,000.00 and not less than \$50.00 for each offence, or in the alternative, by imprisonment for a period not exceeding two months.

9.4 Every person who commits an offence of a continuing nature is punishable on conviction by a fine not exceeding \$200.00 for each day such offence is continued.

10.0 REPEAL

10.1 By-law No. 3417 is repealed.

11.0 EFFECTIVE DATE

11.1 This By-law comes into force and takes effect on the date of its passing.

DONE AND PASSED in open Council the 13th day of July , 1982.

Mayor

M. Harcourt

City Clerk

R. Henry

SCHEDULE A

Every person applying for a permit under this By-law shall pay the appropriate fees set forth herein:

(a) Rate for outlets:

	**Cleat work, Armoured or Non- Metallic Sheathed Cable	Conduit	Fittings & Fixtures	Complete installation of Conduit or Surface Raceway Work where the Inspection can be completed in one visit
*First 10 outlets	\$11.50	\$11.50	\$11.50	\$11.50
Next 10 outlets, each	.55	.90	.50	1.00
Next 20 outlets, each	.50	.80	.45	1.00
Next 40 outlets, each	.45	.60	.35	.80
Next 20 outlets, each	.35	.55	.35	.60
All in excess of 100	.35	.55	.35	.60

*If less than 10 outlets are installed at the same time that any other electrical work is installed and such outlets are included on the same permit and all wiring is completed so that only one inspection is necessary for all work covered by the permit, the fee for such outlets shall be at the rate of \$1.15 each.

**When the inspection of this work can be completed in one visit, no fittings and fixtures permit is required.

Definition of outlet: Each ceiling or wall outlet, or each single-pole, double-pole, or three-way or four-way switch outlet, or each base, or wall plug shall be deemed for the purpose of this Schedule to be an outlet.

- (b) Incandescent outline lighting and exterior fluorescent lighting:
 - (i) For the incandescent outline lighting, lighting of marquees, or other external decorative lighting, a fee of 30¢ per outlet, with a minimum fee of \$11.50
 - (ii) For exterior fluorescent lighting, a fee of 30¢ per foot, with a minimum fee for any such permit of \$11.50
- (c) Electric-Discharge lighting systems:
 - For the first 1,000 feet, a fee per foot of \$.10
 - For the second 1,000 feet, for each 10 feet or any portion thereof, a fee of \$.30
 - For the third 1,000 feet, for each 10 feet or any portion thereof, a fee of \$.20
 - For all footage in excess of 3,000 feet, for each 10 feet or any portion thereof, a fee of \$.15
 - With a minimum fee for any such permit of \$11.50
- (d) Projection rooms: for each projection room, including all equipment with such projection room, a fee of \$60.00
- (e) Emergency Exit Lighting:
 - For each installation of an emergency exit lighting system in any one building \$17.00
 - Plus a further fee for the installation of a light head or outlet* as follows:
 - First 20 light heads or outlets \$ 1.40 each
 - Next 20 light heads or outlets \$ 1.35 each
 - Next 40 light heads or outlets \$ 1.10 each
 - All in excess of 80 light heads or outlets \$.90 each
 - *The fee for outlets will not apply if included in regular fees for a new building.
- (f) Fire Alarm Systems:
 - For each installation of a fire alarm system a fee of \$17.00
 - Plus a further fee for the installation of each gong or break glass as follows:
 - First 20 gongs or break glasses \$ 1.40 each
 - Next 20 gongs or break glasses \$ 1.35 each
 - Next 40 gongs or break glasses \$ 1.10 each
 - All in excess of 80 gongs or break glasses \$.80 each

(g) Domestic electric appliances:

There shall be a minimum charge of \$11.50 for inspecting any one of the following appliances except that on any one permit for wiring in any building where more than one of these appliances can be inspected at the same time, or inspection at the time that other wiring such as rough wiring, fittings or fixtures are being inspected, the following schedule of fees shall apply:

- (i) Non-portable electrical appliances (including those appliances approved for detachable connection) such as a range, water-heater, clothes dryer, automatic washer, combination washer-dryer, garbage disposal unit, air heater, kitchen or bathroom fan over 250W, or other such appliances not listed elsewhere in this schedule \$ 8.00
- (ii) For each additional appliance listed under (i) above, and inspected at the same time \$ 5.00

(h) Domestic type oil or gas burning equipment:

Each installation \$11.50
Provided however that for each installation of commercial type oil or gas burning equipment, the fee shall be as provided in paragraph (l) of this schedule.

(i) Heating apparatus:

For each 2 or 3 wire circuit supplying an electrical furnace, oven, cooking apparatus, electrical steam generator, air heater (commercial only), dryer (commercial only), electrical radiant heating, sauna units or similar apparatus, a fee of \$11.50

(j) Radio and television outlets and antennas:

For the first outlet on the premises, a fee of \$11.50
For each additional outlet, a fee of \$.50
For each antenna, a fee of \$11.50
For the installation of an outlet and an antenna, on the same premises at the same time, a fee of \$11.50
With a further fee for each additional outlet of \$.50

(k) Sign circuits:

For circuits to each electric sign, a fee of \$11.50

(1) Motors, etc:

For each motor, compressor, business machine, computer, rectifier or generator, the fee shall be as follows:

1/4 h.p. and not exceeding 1	\$11.50
Exceeding 1 h.p. but less than 5	\$13.00
Exceeding 5 h.p. but less than 10	\$14.00
Exceeding 10 h.p. but less than 50	\$21.00
Exceeding 50 h.p.	\$29.50
Less than 1/4 h.p. each	\$ 2.60
But with a minimum fee of	\$11.50

(m) Transformer stations:

- (i) High potential (over 750 volts)
For each transformer or transformer station whether located inside or outside a building, including a primary switchboard, a fee of\$60.00
- (ii) Low potential (up to 750 volts)
For each transformer or transformer station whether located inside or outside a building, a fee of\$11.50
- (iii) For the first capacitor or capacitor bank, a fee of\$11.50

For the first capacitor or capacitor bank on the same permit in the same building if installed and inspected at the same time, a fee of\$ 2.60
- (iv) Electric welders* (arch or resistor type), a fee of\$20.00
*For motor-generator type welders, the fee shall be as provided in paragraph (1) of this schedule.

(n) Service equipment, switchboards, panel boards and distribution centres (up to 750 volts):

Service equipment, switchboards, panel boards and distribution centres shall include any assembly of switches, overcurrent devices, panels, etc., at any one location in a building.

Up to 200 amps, a fee of	\$11.50
201 amps to 400 amps, a fee of	\$15.50
401 amps to 600 amps, a fee of	\$18.00
Over 600 amps, a fee of	\$20.00

Except for panels located in one or two family dwellings or panels located in individual dwelling units in multi-family occupancies, the above fees shall be in addition to the fees shown for outlets and other equipment as shown in this schedule.

- (o) Alterations to service:
For the installation of new service equipment in a building already wired, the fee shall be as provided in paragraph (n) of this schedule.

This fee shall apply to any change in the service except where only the service conductors are changed and a permit is obtained for other work which can be inspected at the same time as the new service conductors are inspected.

- (p) X-ray machines:
For each x-ray machine, a fee of \$11.50

- (q) (Reserved)

- (r) Poles supporting electrical equipment:
For each pole supporting overhead wires, street lights, floodlights and other equipment other than in paragraph (m)(i) of this schedule, a fee of\$ 2.60
With a minimum fee of\$11.50

- (s) Circus, carnival, trade or convention exhibit shows or similar shows:
For the complete inspection of each circus, carnival, trade or convention exhibit show or similar show, the fee shall be:

Where the connected load does not exceed 200 amps at 230 volts\$42.50
Over 200 amps at 230 volts\$88.50

- (t) Underground consumer services:
For each underground consumer service, a fee of\$18.50

For second service in the same trench installed at the same time, the fee shall be as provided in paragraph (n) of this schedule.
This paragraph (t) is not applicable to residential underground consumer services.

(u) Hourly inspection fee:

- (i) For each inspection of electrical work in respect of which no specific fee is herein prescribed, payment shall be made on the basis of time actually spent in making such inspection, as follows:

For the first hour or part hour \$26.00
For each additional hour or part hour \$20.00

- (ii) For each inspection of any premises to determine if the wiring complies with this By-law, the fee shall be in accordance with sub-paragraph (i) above.

(v) Re-inspection:

For each inspection necessary for examining electrical installations where errors or omissions were found at a previous inspection, a fee of \$15.00

(w) Temporary power:

For each permit or extension thereof for a temporary connection of power, a fee of:

From 1 to 30 days.....\$11.50
From 31 to 60 days.....\$15.50
From 61 to 90 days.....\$20.00
From 91 to 120 days.....\$23.50

(x) Gasoline dispensing devices:

For the first dispensing device \$11.50
For each additional dispensing device on the same premises, inspected at the same time \$ 4.00
For remote compressor, the fee shall be as provided in paragraph (1) of this schedule.

(y) Minimum inspection fees:

Notwithstanding anything that may be contained in any of the schedules of fees herein, there shall be a minimum charge of \$11.50 for inspection of any premises or portion thereof as covered by a permit, except as provided in paragraph (w) of this schedule.

- (z) The fee for an annual permit for any one commercial or industrial plant or establishment shall be as hereinafter set forth. Where one person, firm or corporation has more than one plant or establishment, a separate annual permit shall be required for each of such plants or establishments. Annual permit fees shall be as follows:

Connected load or horsepower:
1,000 h.p. or less \$123.00
Each additional 100 h.p. or fraction thereof \$ 11.50
Maximum fee\$1,000.00
