

BURRARD SLOPES PARK

Concept Plan

Park Board Committee Meeting
Monday, April 13, 2026

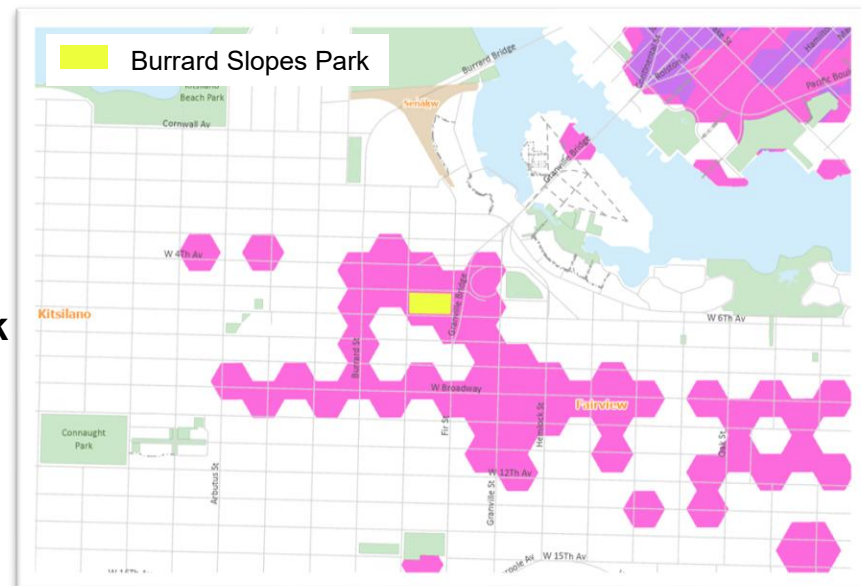

perspective view into future Burrard Slopes Park

- To provide an overview of the proposed concept plan.
- To share the results of the public engagement process.
- To seek Board decision on the proposed concept plan to advance the project to detailed design followed by construction.

Context, Background and Park Provision

- Located between **Fairview and Kitsilano** neighbourhoods
- One of the only new parks in the high growth **Broadway Plan** area
- Completes a major **active transportation network** including Arbutus Greenway, Seaside Greenway Connection, and Granville Bridge Connector
- Increases **park provision** for residents within 10-minute walk from 0.53 ha to 0.76 ha /1000 people.
- Supported by principles outlined in multiple policy documents (VanPlay, Broadway Plan, Parks Washroom Strategy, Rain City Strategy, Skateboard Amenities Strategy, Arbutus Greenway Design Vision, etc.)

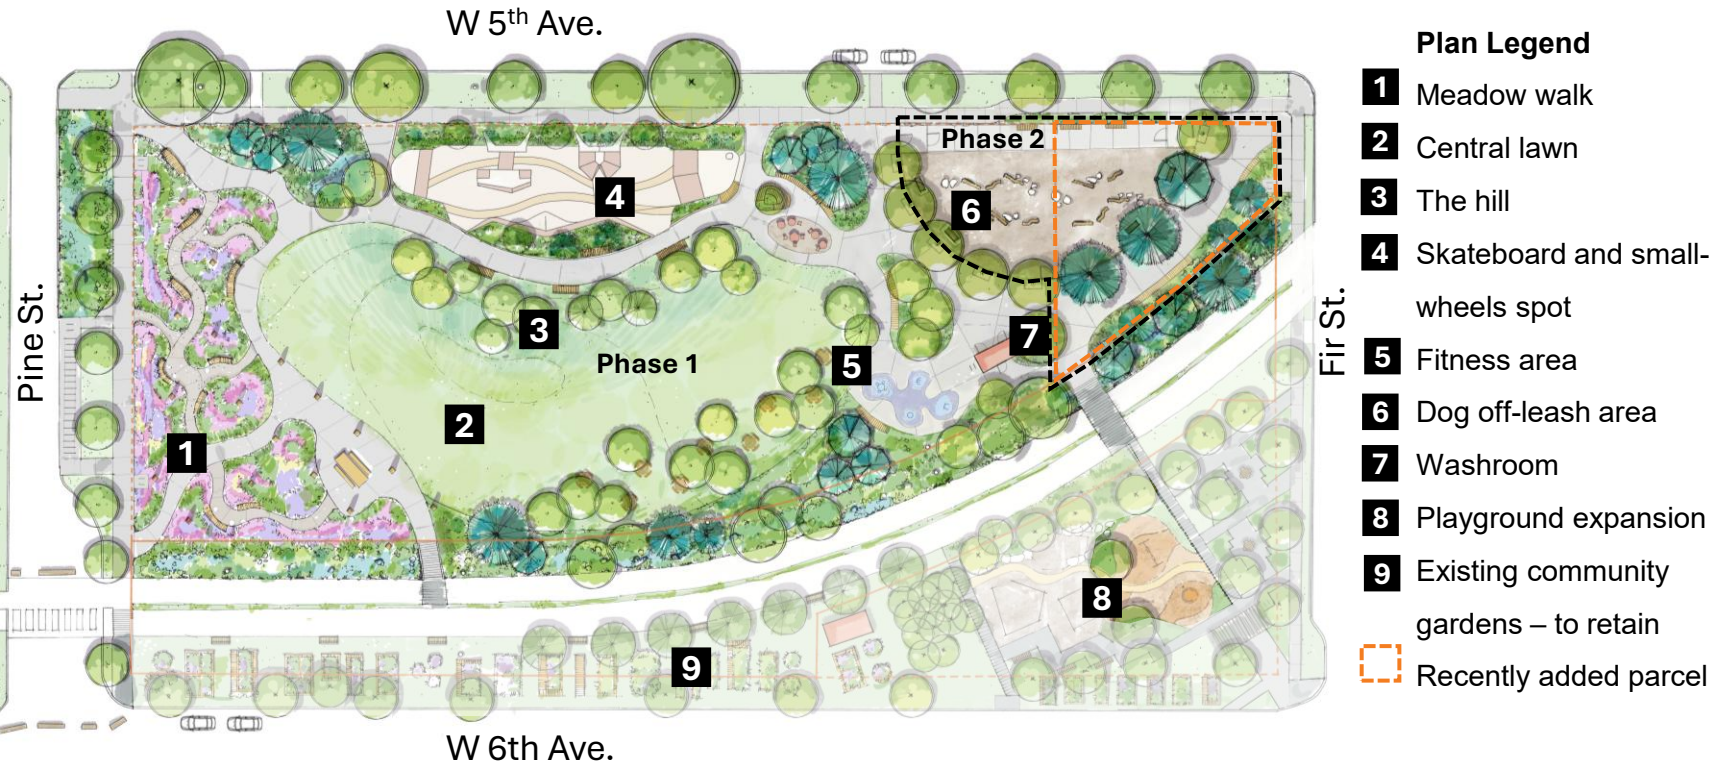

VanPlay Equity Initiative Zones: Tree Canopy and Park Access Gaps

Per VanPlay (2019), the current City-wide park provision target is 1.1 hectares of greenspace per 1000 residents.

Proposed Concept Plan

3 new play features added to existing playground

- **Public engagement events:** Two rounds of events in fall 2023 and spring 2025.
 - Shape Your City project page: 75,000+ visits
 - Online survey: 1,917 responses
 - Pop-up and open house events: 335 attendees
 - Engagement and information sharing with **interest holders, adjacent businesses** and **civic agencies**
 - Over 80% supported the overall park concept plan and nearly 85% felt the design will meet the needs of the community for a welcoming and safe park
 - Key areas of feedback included skatepark sound, washroom safety, and dog off-leash area size
- **Local First Nations:** Engagement through the inter-governmental referral process since 2020

Open house event at 6th and Fir Park

- The estimated capital cost for Burrard Slopes Park is \$13.1M, based on a 'Class D' construction estimate including soft costs, project management fees, permitting, and contingencies.
- \$8.8M is anticipated to be funded through 2027-2030 Capital Plan, remainder funded from previous capital plan.
- The initial estimate for the operating impact to capital budget is 5% of the estimated project construction cost or \$400K per year, starting in 2031.
