

Report Date: April 4, 2026

VanRIMS No.: 08-3000-30

[Submit comments to the Board](#)

TO: Park Board Chair and Commissioners
FROM: General Manager, Board of Parks and Recreation
SUBJECT: South Vancouver Park Amenities - Concept Plans

RECOMMENDATIONS

- A. THAT the Vancouver Park Board approve the proposed concept plan for the Moberly Park amenities including a new synthetic turf field, a new fieldhouse and a new walking loop as described in this report.
- B. THAT the Vancouver Park Board approve the proposed concept plan for the Ross Park amenities including a new spray pad, a new washroom building and playground renewal as described in this report.

PURPOSE AND SUMMARY

The proposed park amenity improvement concept plans described for Moberly Park and Ross Park are in response to previous Park Board decision on South Vancouver Park Amenities in June 2024.

The purpose of this report is to provide an overview of the projects and public information session process, and to seek a Board decision on the concept plans for the Moberly Park and Ross Park Amenities (See Figure 1 & 2) before these projects can proceed to detailed design .

POLICY, REPORTS & STRATEGIES

Board Authority

As per the [Vancouver Charter](#), the Park Board has exclusive jurisdiction and control over all areas designated as permanent and temporary parks in the City of Vancouver, including any structures, programs and activities, fees, and improvements or major changes that occur within those parks. The Vancouver Park Board approves major changes in Vancouver parks including the design and development of parks. Permanent Park designation has been assigned to both Moberly Park and Ross Park.

Previous Board Decisions

On [December 5, 2022](#) the Park Board directed staff to initiate planning in Q1 2023 for a new synthetic turf sports field in southeast Vancouver, ideally to be located at Moberly School or Ross Park.

On [May 29, 2023](#) the Park Board directed staff to undertake a community engagement process

in the Sunset neighbourhood to seek feedback that identifies the desired outdoor amenities for the community. On [December 11, 2023](#), staff reported back to the Board with the findings of the Sunset community engagement results.

On [October 30, 2023](#), The Board approved the motion for “An Inclusive Children's Water Park at Ross Park - Bridging the Gap in an Underserved Neighborhood,” which directed staff to begin the engagement and design process for this spray park. The Province of British Columbia's [Growing Communities Fund](#) (GCF) was identified as the funding source and staff were further instructed to report back to Park Board and City Council regarding scope, cost and delivery timelines for the project.

On [June 24, 2024](#), The Board approved the South Vancouver Park Amenities. Following this decision staff began project planning. Consultant teams have since been engaged and tasked with design for both Moberly Park and Ross Park amenities projects.

On [September 19, 2025](#) the Sports Field Projects – Update Board briefing memorandum was distributed. The memo indicated that the Moberly Synthetic Turf Field will be lined exclusively for field hockey, following International Field Hockey Federation regulations. This approach is supported by key field hockey and soccer user groups as represented by the Vancouver Field Sport Federation (VFSF). The VFSF confirmed that short pile turf is unsuitable for youth soccer games, therefore youth soccer field lining is not required.

City Council Motions

On [July 26, 2023](#), City Council approved an initial multi-year capital budget and funding adjustment for City projects identified in the provincial Growing Communities Fund (GCF). Council directed staff to include Parks within the priorities for the initial GCF grant, and that a portion be used to fund a new synthetic turf field at Moberly Park and a spray park at Ross Park, both of which have been identified as a priority by the South Vancouver community, with further direction that staff conduct the appropriate analysis and report back to Council regarding the scope, cost and delivery timelines for these projects.

On [October 18, 2023](#), Council approved an allocation of \$10 million from the GCF that included a synthetic turf field at Moberly Park and a spray park at Ross Park among other projects. Council also directed staff to report back with scope and detailed costing information for the field at Moberly Park and spray park at Ross Park projects in 2024.

On [July 23, 2024](#), Council approved 2023-2026 Capital Mid-Term Update (MTU) that included funding allocations from the GCF for costs associated with the delivery of new fieldhouses at both Moberly Park and Ross Park.

Related Park Board and City-wide Strategies and Policies

The proposed concept plans for Moberly Park and Ross Park Amenities are supported by principles outlined in the following Park Board plans and strategies. For descriptions and relationship to Moberly and Ross Parks, see Appendix C: Related Park Board and City-wide Strategies and Policies.

- [VanPlay](#) (2019/2020)
- [VanSplash](#) (2019)
- [Urban Forest Strategy](#) (Updated 2025)

- [Water Priority Action Plan](#) (2023)
- [Vancouver Sport Field Strategy](#) (2024)
- [Parks Washroom Strategy](#) (2020)

CONTEXT AND BACKGROUND

Moberly Park and Ross Park are designated permanent neighbourhood parks serving the Sunset community in South Vancouver, a culturally diverse and family-oriented area with approximately 36,500 residents, representing 6% of the population in the city. With Vancouver projected to add tens of thousands of new residents over the coming decades, many through incremental densification in established community like Sunset. The land use surrounding Moberly and Ross Parks is predominately low density residential, characterized by single-family homes with secondary suites and multiplex infill, contributing to consistent neighbourhood demand for inclusive, accessible, and culturally responsive programming.

Following approval of the project funding in July 2024, staff initiated the required site technical studies including archaeological, topographic, arboricultural, and geotechnical investigations. The multi-disciplinary consultant teams for Moberly Park and Ross Park Amenities were subsequently retained in Q3 2025 for design and construction administration. Refer to Appendix B for further context information.

Moberly Park

Moberly Park is a 3.6-hectare neighbourhood park located along E 59th Avenue and Prince Albert Street. The park currently accommodates a range of amenities including sports fields, playground, community garden, tennis courts, mature trees, and the Moberly Arts and Cultural Centre. Moberly Park is directly adjacent to Walter Moberly Elementary School, resulting in shared use of open space and high use by students in weekdays. The Masumi Mitsui Greenway, which directly borders the north edge of Moberly Park, provides an east-west walking and cycling connections across south Vancouver. The project site is located at the north field, which is presently classified within the Vancouver Park Board's inventory as a grade B-1 grass field in the system. The north field is primarily programmed for youth soccer use. A review of field assets and permit record indicates that this level of activity can be accommodated at nearby fields.

Ross Park

Ross Park is a 1.51-hectare neighbourhood park, two blocks east of Moberly Park, bounded by Ross Street (Khalsa Diwan Road), Sherbrooke Street, E 57th Avenue and 59th Avenue. The current park features include mature trees, children's play areas, fieldhouse with washrooms, wading pool, picnic shelter, seating areas and grass field. The project area is the south end of the park, which is currently used for social gathering and summertime playground and wading pool programming. These activities will be enhanced with a new spray park and seating areas and a renewed playground. The existing fieldhouse is aging and does not meet current accessibility or gender-inclusive service levels. The fieldhouse has been used for informal community activities, which can be accommodated at other nearby facilities. Replacement of the building supports inclusivity and provides an opportunity to right-size the facility and reduce long-term capital maintenance costs.

DISCUSSION

The following section provides an overview of the concept plan and the considerations that have contributed to its development, broken down as follows:

- Moberly Park Amenities Concept Plan
- Ross Park Amenities Concept Plan
- Sunset Neighbourhood Engagement
- Moberly Park and Ross Park Public Outreach
- Neighbourhood Impacts Assessment

Moberly Park Amenities Concept Plan

The Moberly Park Amenities concept plan creates a vibrant and inclusive park that supports field hockey and other recreational activities. Highlights of the proposed concept plan are described below. See Figure 1: Moberly Park turf field and fieldhouse concept plan.

Figure 1: Moberly Park turf field and fieldhouse concept plan

Synthetic turf field hockey field (Field Hockey Federation (FIH) standard):

- The proposed synthetic turf field will replace the existing grade B-1 grass field.
- Designed to meet FIH Innovation Category – Dry Turf and Category 3 standards, supporting regional and local competitions, as well as community training.
- The field will be operated as a non-irrigated (dry) turf system, which requires significantly less water for play and has lower initial capital and ongoing maintenance and operating costs compared to traditional water-based fields.
- The project will include provisions for a wet-down irrigation system to support elite level play should demand be identified. The irrigation system also provides the benefit of surface cooling during periods of high summer temperatures for improved player safety and comfort.
- The field will be lined for field hockey only but can support youth soccer practices.
- Warm up area will be considered close to main field.

Refer to Appendix F for more information about FIH standards.

Sports Field lighting:

- The sports field lighting system will be designed to FIH Class II for training and club competitions.
- LED sports field lighting with associated control system connected to booking system.
- Extends programming hours of the turf field.
- Fixtures are designed to reduce lighting spill and glare disruption.

Fieldhouse:

- Located to the southwest corner, closest to existing servicing connections.
- Two publicly accessible, universal washrooms.
- Three public universal washrooms.
- Four changerooms with showers and washrooms.
- Storage rooms.
- Drinking fountain/bottle filler is provided on exterior wall.

Accessible looping path:

- Loops around the field to connect and provide universal access to new and existing amenities.
- Support casual community use, including walking, running, and rolling.
- Pedestrian lighting provided to improve safety and user experience.

Flexible spectator seating:

- Located along north side of the turf field.
- Supports casual community use.
- Spectacular views to Mount Baker and Richmond.

- Weather protection will be considered close to the sidewalk, dependent on funding.
- The flexible lawn area west of the turf field provides space for temporary seating.

Site furniture:

- Mist station, signage, seating will be provided along the main loop.

Planting, Trees and Meadow:

- 11 new deciduous trees are introduced to enhance the urban forest canopy.

Ross Park Amenities Concept Plan

The Ross Park improvements concept plan proposes to replace aging park features and improve recreational amenities by creating a recirculating spray park, renewed playground and new washroom building in support of a growing and diverse neighbourhood. The spray park will replace the existing wading pool and all new water features will be recirculating in compliance with Vancouver Coastal Health (VCH) requirements. The existing fieldhouse will be demolished and replaced with a new compact building that will include new washrooms to meet regulatory and accessibility requirements. The current playground has reached the end of its service life and is due for replacement. New accessible pathways are located throughout the plan to connect park features. Highlights of the proposed concept plan are described below. See Figure 2: Ross Park improvements concept plan.

Figure 2: Ross Park improvements concept plan

Recirculating spray park:

- Water features for a range of ages and abilities including low intensity features such as bubblers and ground sprays, and high intensity features such as splash bucket and overhead sprays
- Tinted pattern, non-slip spray park hard surfacing
- Water recirculation tank
- Outdoor seating
- Drinking fountain

New washroom building:

- Four publicly accessible and universal washrooms
- Playground storage to support existing summer programming
- Mechanical room to house spray park equipment
- New exterior wall mural based on the existing mural surrounding the wading pool by the original artist
- Outdoor showers

Playground renewal:

- Some retained play structures with refreshed features and playground surfacing
- New play equipment to support inclusive play for a range of ages and abilities including accessible swings and spinners
- Outdoor seating
- Shade trees and planted areas

Sunset Neighbourhood Engagement

From July through November 2023, Park Board staff carried out a multiphase engagement process in the Sunset neighbourhood to better understand how residents use local parks and what outdoor amenities they value. Engagement activities included popups, community mapping exercises, workshops with local organizations, and a third-party intercept survey conducted in Punjabi, Mandarin, and English.

Staff documented support for a synthetic turf field at all community engagement events and a higher level of organized support at advertised events. In addition to support for a synthetic turf field, there was high level support for walking loops, improved seating, gathering spaces, playgrounds and open and natural grass areas through the intercept survey and pop-up events. (Refer to Appendix D Sunset Neighbourhood Engagement Key Themes). These findings helped shape the development of the concept plans included in this report.

Moberly Park and Ross Park Outreach

Public information sessions for the Moberly Park and Ross Park improvements were held in December 2025, with 70 participants joining Park Board staff to learn about the draft design concepts, ask questions and view project information. Additional public outreach included meeting with field hockey user groups to share the Moberly Park concept and meeting with secondary school students participating in a Reframing South Vancouver afterschool club who

shared their visions for Ross Park. Refer to Appendix E for details about public engagement activities, dates and participation.

Participants expressed broad support for both concept designs. Key themes that emerged during the information sessions about elements incorporated in the concepts are as follows:

Moberly Park

- Support for field hockey primary facilities - Interest in elite level of play
- Desire for spectator seating
- Support for a walking loop with lighting and seating

Ross Park

- Value of the existing mural around the wading pool
- Need for more seating areas
- Desire to see more colour in the playground
- Interest in accessibility upgrades

Comments and questions about adding other park amenities will be considered during the detail design phase, depending on budget. Requests for larger amenities that could not be addressed in the current designs include the following:

- Another shade structure in Ross Park
- Covered spectator seating in Moberly Park
- Outdoor exercise equipment

Neighbourhood Impacts Assessment

Issue	Impact	Mitigation
Moberly Park		
Existing field bookings displacement	Moberly Field North is booked for youth soccer.	Youth soccer practices can use the new synthetic turf field. Existing uses for youth soccer games can be relocated to Moberly Field South or Ross Park with additional South Vancouver fields such as Killarney coming online.
Parking	The increased use of synthetic turf fields and extended hours can affect nearby neighbourhoods by adding traffic and increasing parking demand.	Approximately 90 parking spaces of unrestricted street parking are available on park side. Vancouver School Board indicated future opportunity for the parking lot

		at Walter Moberly Elementary School converted to public pay parking, adding potential 40 parking spaces outside of school hours. Transit and active transportation routes are near Moberly and Ross Parks. Both parks are within a 10-minute walk to transit stops on Fraser and Knight Streets and located along the Masumi Mitsui Greenway.
Sport field lighting	Field lighting can affect nearby neighbourhoods by prolonging noise and light during hours of play.	To minimize the impact of extended lighting hours, the field will use a two-tiered lighting system. High-level field lights will operate only during permitted booking times through a controlled software system, ensuring they are off when the field is not in use. Lower-level pedestrian lighting will remain on after bookings end to support pedestrian safety around the field.
Ross Park		
Fieldhouse use	Ross Park Fieldhouse has been utilized for informal community activities that includes card games. The engagement, including the recent presentations of the proposed design, did not result in any concerns related to displacement of these activities.	These activities can be accommodated at nearby facilities, including the Moberly Arts Centre and the soon to be completed new senior centre at Sunset Community Centre.

Table 1: South Vancouver Amenities Neighbourhood Impacts Assessment

FINANCIAL CONSIDERATIONS

The total estimated capital cost of the projects, including design, project management fees, permits, construction and contingencies, is estimated to be \$18.6M. Funding allocation is primarily from the Growing Communities Fund and through the 2023-2026 Capital Planning Mid-Term Update (MTU) To provide the additional proposed park amenities (playground renewal at

Ross Park and addition of a walking loop at Moberly Park) a reallocation of \$0.8M from existing capital funding sources has been allocated. Funding allocation is summarized in the table below.

Project	Approved Funding Source	Approved Funding Amount	Approved in Capital Planning MTU (new fieldhouse/washroom building)	Total Project Costs
Moberly Turf Field and Fieldhouse	Growing Communities Fund	\$8.3M	\$5.3M	\$13.6M
Ross Spray Park and Washroom Building	Growing Communities Fund	\$1.7M	\$2.5M	\$4.2M
Additional Park Amenities (both sites)	Capital Plan - existing accounts	\$0.8M	-	\$0.8M
TOTAL		\$10.8M	\$7.8M	\$18.6M

Table 2: South Vancouver Park Amenities Funding

Operating Costs for Moberly Park Amenities

General maintenance costs for synthetic turf fields can reach up to \$60K annually, excluding hard asset repairs (e.g. fencing, drainage, asphalt etc.). Should the project be approved, the operating budget would require a one-time cost for specialized maintenance equipment acquisitions estimated at \$75K.

Operating Costs for Ross Park Amenities

The initial estimate for the operating impacts to capital budget is calculated as 5% of the estimated project construction cost or \$85K per year upon project completion.

NEXT STEPS

Subject to the Board's decision on the recommendation outlined in this report, detailed design for these concept plans will commence. Next steps also include obtaining the required development and building permits for the synthetic turf field lights and new fieldhouse and washroom buildings. Construction of these amenities are targeted to begin in Q1 2027 and be completed in 2028, dependent on favourable weather conditions for the completion of some features. The public will be notified of project progress through onsite signage, project webpage and emails to community groups and interest holders that were identified during the public engagement process. Staff will explore innovative contracting opportunities to potentially shorten the overall project timeline.

CONCLUSION

The concept plans for the South Vancouver Amenities align with Park Board policies and are well supported by the community. Staff recommend the Vancouver Park Board approve the proposed concept plans for Moberly Park and Ross Park as described in this report so that the projects can proceed to detailed design and construction.

Figure 7: Context Plan for Moberly Park

Figure 8: Context Plan for Ross Park

APPENDIX C

Related Park Board and City-wide Strategies and Policies

The proposed concept plans for Moberly Park and Ross Park Amenities are supported by principles outlined in the following Park Board plans and strategies:

Park Board Plans and Strategies:

VanPlay (2019/2020): The Park Board's Parks and Recreation Services Master Plan sets priorities and provides tools and policies to support the pursuit of equity, connectivity, and access to parks and recreation for all. The neighbourhood surrounding Moberly Park and Ross Park falls within an equity initiative zone based on key indicators that identified it as having tree canopy gaps and a high demand for low barrier recreation services (Refer to Appendix B). The park improvements also help to meet 2040 Asset Targets identified in VanPlay by providing enhanced natural area and habitats for bird and pollinator, universally accessible play features in the renewed playground, continuous and accessible paths for all users.

VanSplash (2019): Vancouver Aquatics Strategy, approved by the Park Board, lays out a 25-year vision and a city-wide approach to planning future pools and other aquatic amenities including wading pools and spray parks. Following Recommendation 1 for Wading Pools and Spray Parks, the wading pool at Ross park will converted to a spay park.

Urban Forest Strategy (2014): Policy and operational guidelines to enhance the urban forest on private lands, streets, and parks. Following the strategy's first goal to Protect against the decline of canopy cover, healthy trees will be retained at both Moberly Park and Ross Park. Following the strategy's second goal to Plant to increase the urban forest canopy, new trees will be added to the parks where space and activities allow.

Water Priority Action Plan (2023): A Park Board approved five-year plan to guide operational decisions about the use of drinking water in parks and recreation facilities. Potable water will be conserved by designing a recirculating system for the Ross Park spray park and a 'dry turf' synthetic turf field at Moberly Park.

Vancouver Sport Field Strategy (2024): A city-wide guide to sport field development, management and maintenance decision making in Vancouver for the next 10+ years. The strategy prioritizes the development of a field hockey specific pitch in a location in South Vancouver. On [June 24, 2024](#), The Board approved the South Vancouver Park Amenities that confirmed Moberly Park as the location for the field hockey field.

Parks Washroom Strategy (2020): The strategy guides the planning and improvement of public washrooms in parks managed by the Vancouver Park Board. It focuses on increasing access, upgrading aging facilities, improving cleanliness and safety, and ensuring accessible and inclusive washrooms for park users. The washroom at Ross Park will be replaced and a new fieldhouse will be constructed at Moberly Park. Both facilities will be designed according to the recommendations and guidelines in the strategy.

Appendix D

Sunset Neighbourhood Engagement Key Themes

In July to November 2023, Park Board staff conducted a multi-phase engagement process in the Sunset neighbourhood to better understand how residents use local parks and what outdoor amenities they value. Sunset Neighbourhood Engagement was presented to the Park Board on [December 11, 2023](#).

Engagement Activities	• Included pop ups, community mapping exercises, workshops with local organizations and a third-party intercept survey conducted in Punjabi, Mandarin and English.
Public Participation	• Staff collected: ○ 461 paper questionnaires ○ 98 mapping inputs ○ With additional conversations held at community festivals and neighbourhood events.
Intercept Survey	• Statistically representative survey of 500 Sunset area residents • Conducted in English, Cantonese, and Punjabi designed to reflect neighbourhood demographics • Identified top outdoor amenity priorities including: ○ walking paths ○ natural areas ○ shade trees ○ synthetic turf fields ranking higher among respondents aged 19–34.
Key Themes	• Strong interest in investment in Sunset area parks; • Need for a variety of accessible, low-barrier outdoor amenities; • Safety concerns around existing facilities; • Desire for improved seating, gathering spaces and multi-use pathways; • Importance of culturally responsive, multilingual engagement.

Table 3: Sunset Neighbourhood Engagement Approach and Key Findings

APPENDIX E

Moberly Park and Ross Park Outreach

Moberly Park Engagement Summary

Moberly Park synthetic turf and fieldhouse

Outreach summary

What's happening?

The Vancouver Park Board is adding new field hockey facilities to Moberly Park by replacing the north field with a synthetic turf field. The project will include a new field hockey synthetic turf, high mast sports field lighting, new fieldhouse building, including washroom and team change rooms, drinking fountain, seating areas, and walking loop. The concept design is guided by policies and directions from Park Board staff and experts in synthetic turf field design.

We hosted information sessions at the Moberly Arts and Cultural Centre and the South Vancouver Neighbourhood House to share the draft concept and answer community questions. These sessions took place on December 6 and 10, 2025. We also held an online concept presentation for field hockey user groups on March 3, 2026. This report summarizes all three sessions.

Draft concept

- | | | |
|-------------------------------------|------------------------------------|-------------------------------|
| 1 Synthetic turf field hockey pitch | 5 Warm-up area/flexible open space | 8 Existing grass sports field |
| 2 Fieldhouse | 6 Maintenance access | 9 Field light |

Figure 9: Moberly Park Public Information Session Summary - Page 1 of 3

Moberly Park synthetic turf and fieldhouse

Outreach summary

Highlights

-  70 visitors joined Park Board staff for in-person information sessions on December 6 and 10, 2025.
-  Information signs and posters were posted in the park and at South Vancouver community centres and libraries.
-  Translated key information from engagement materials into Punjabi, Tagalog, and both Simplified and Traditional Chinese
-  Shared project details directly with neighbouring organizations, including Moberly Arts and Culture Centre, South Vancouver Neighbourhood House, and Khalsa Diwan Gurdwara.
-  Hosted virtual concept preview presentation attended by representatives from field hockey user groups to share and discuss concept details.

What we heard

During the information sessions, Park Board staff shared details about the draft concept and answered questions from attendees. The comments below reflect the topics people were most curious about or sought clarification on. Comments and questions about adding specific park amenities will be considered during the detail design phase, depending on budget.

Comments on draft concept

New synthetic turf field

Questions and comments included:

- Excitement about investment into new **field hockey primary** facilities.
- How the field will be dressed, and what level of play it will accommodate. The field will be **unfilled dry turf** and accommodate up to national level play.
- Whether **more bleachers** or space for temporary bleachers could be provided.
- Whether **soccer** can be played on the new field. The field only includes lines for field hockey, but could support youth soccer practice.

Walking loop

Questions and comments included:

- Interest in **softer surfacing**, such as rubber, for the walking loop.
- Whether **lighting** will be available along the loop.
- Requests for **seating**, including covered seating.
- Interest in adding **outdoor exercise equipment** along the route.

Other comments

- General **support** for the draft concept.
- Appreciation for **investment** in the community.
- Questions about fieldhouse safety and how **security concerns** will be addressed.
- Suggestions to include amenities that support community events at the park, such as **covered gathering areas**.
- Questions about parking availability.
- Interest in **improving connections** to nearby pathways and neighbourhood routes.

Figure 11: Moberly Park Public Information Session Summary - Page 3 of 3

Ross Park Engagement Summary

Ross Park improvements

Outreach summary

What's happening?

The Vancouver Park Board is making improvements at Ross Park. These include replacing the existing wading pool with a new spray park, and renewing the existing playground and fieldhouse washrooms. These improvements will replace existing aging features and enhance recreational amenities to support a growing and diverse neighbourhood.

We have developed a concept design guided by policies and directions from Park Board staff with expertise in spray park, playground and fieldhouse design. The concept plan proposes new water spray features, surfacing, and mechanical systems, as well as renewed play equipment, and new universal fieldhouse washrooms designed to be fully accessible and comfortable for all community members.

We hosted information sessions at the Moberly Arts and Cultural Centre and the South Vancouver Neighbourhood House to share the draft concept and answer community questions. These sessions took place on December 6 and 10, 2025. This report summarizes the two sessions.

Draft concept

Figure 12: Ross Park Public Information Session Summary - Page 1 of 3

Ross Park improvements

Outreach summary

Highlights

-  70 visitors joined Park Board staff for in-person information sessions on December 6 and 10, 2025.
-  Information signs and posters were posted in the park and at South Vancouver community centres and libraries.
-  Translated key information from engagement materials into Punjabi, Tagalog, and both Simplified and Traditional Chinese
-  Shared project details directly with neighbouring organizations, including Moberly Arts and Culture Centre, South Vancouver Neighbourhood House, and Khalsa Diwan Gurdwara.
-  Led design discussions with students from David Thompson Secondary. Students then developed their own concept designs and visions for the future park.

What we heard

During the information sessions, Park Board staff shared details about the draft concept and answered questions from attendees. The comments below reflect the topics people were most curious about or sought clarification on.

Comments and questions about adding specific park amenities will be considered during the detail design phase, depending on budget.

Comments on current condition

Shaded seating area

- Shade structure is **well utilized** by community
- People bring their own furniture due to lack of sufficient seating
- Strong desire for **more seating areas** and seating types to serve different groups

Existing playground and wading pool

- Some residents expressed that they like the existing wood play structure, but would like to see **more colour** in the playground
- Existing mural is valued by the community

Comments on draft concept

New spray park and renewed playground

Questions and comments included:

- Whether the **existing mural** will be reintegrated into the design. We will be consulting the original artist throughout the design process to explore ways to reintegrate the mural
- Appreciation for the inclusion of **multiple seating areas** around the spray park and playground
- Desire for an **additional shade structure**
- Interest in **accessible upgrades** to the playground. This will be included in the park design
- Interest in **outdoor fitness equipment**

Other comments

- General **support** for the draft concept
- Appreciation for **investment** in the community
- Questions about washroom safety and how **security concerns** will be addressed

APPENDIX F

FIH Standards

Moberly Park Amenities	FIH Construction Category	Typical Use	Surface Type	Comments
	Category 1	Elite Hockey Top-level international, Televised tournaments. Dedicated hockey field	Requires a water-based turf Turf colour must be blue	Class I lighting system for television Irrigation system is required Field must be originated in a north/south direction
	Category 2	High Performance International and national televised tournaments. Dedicated hockey field	Requires a water-based turf If used for televised events Turf must be blue, otherwise turf is to be green	Class I lighting system if televised events are planned Irrigation system is required Where possible field originated in a north/south direction (mandatory for televised events).
Moberly Park field hockey field	Category 3/ Innovation Dry Field	Performance and Participation Regional and local hockey. Typically, a dedicated hockey field	Turf may be wet, sand-dressed dry or innovation category dry turf Turf to be blue or green	Proposed target Irrigation is optional Where possible field originated in a north/south direction. Not televised.
	Category 4	Participation Local, community and school hockey plus other sports. May have multi-sport line markings	Sand-dressed or sand filled dry turf	

	Category 5	Foundation and Participation Fields with surfaces primarily intended for soccer, but also allow basic development hockey activities to take place	Long pile infilled synthetic turf (dry)	
--	------------	---	---	--

Table 4: FIH Field Certification comparison and Moberly Park field target

Moberly Park Amenities	FIH Standard	Intent	Comments
	FIH Class I	high-level national and international competitions	Class I lighting is not considered appropriate for this project sited in single family neighborhood.
Moberly Park sports lighting	FIH Class II	training and club competitions	Proposed Target
		Lighting for Development & community level training is not normally a separate category	Lighting is achieved through switching or diming of a Class I or Class II lighting system.

Table 5: FIH sports lighting comparison and Moberly Park sports lighting target
