

PARK BOARD MEETING HIGHLIGHTS

— May 4, 2026 —

The following information is intended to provide a brief overview of the Board's governance work at the Committee and Board meetings. The full agenda, meeting materials, video clips and official minutes can be found on the [Park Board website](#).

STAFF REPORTS / PRESENTATIONS

Tree Inspection Policy

The Board approved the [Tree Inspection Policy](#) to replace the previous policy adopted in 1993. The updated policy modernizes and consolidates how the City manages tree risk on public lands, aligns with contemporary arboriculture best practices, and advances the [Urban Forest Strategy \(2025\)](#) goal of managing trees for health and safety. The policy establishes a single, citywide framework for tree inspection and risk mitigation, and expands the policy's scope beyond street and park trees to include civic lands, laneways, forested areas, shared trees, and inaccessible trees to address gaps and inconsistencies across departments. It also provides a consistent, defensible, and achievable approach to managing tree-related risk across the City while supporting the long-term health and sustainability of Vancouver's urban forest.
